Articles

Analysing a mixed-mode plane problem by using J_k integrals
S. A. Hamoush and M. Reza Salami 441

Application of low-cycle fatigue data to pressure vessel design fatigue curve
Li Yimin, Wang Jinrui and Sun Zhongxiao 215

Application of Wheeler retardation model for assessment of fatigue crack lifetime under random overloads
R. Arone 275

Crack growth retardation due to intermittent overloads
Ö. Vardar and N. Yildirim 283

Damage-tolerance-based life prediction of aeroengine compressor discs: I. A deterministic fracture mechanics approach
A. K. Koul, N. C. Bellinger and A. Fahr 379

Damage-tolerance-based life prediction of aeroengine compressor discs: II. A probabilistic fracture mechanics approach
A. K. Koul, N. C. Bellinger and A. Fahr 388

The effect of compressive underloads and tensile overloads on fatigue damage accumulation in SAE 1045 steel
M. A. Pompetzki, T. H. Topper and D. L. DuQuesnay 207

The effect of S-phase distribution on fatigue crack growth in peak-aged Al–Li–Mg–Cu–Zr alloys
H. D. Dudgeon and J. W. Martin 253

Effects of stress ratio on fatigue crack propagation in Q1N (HY80) pressure vessel steel
W. O. Soboyejo and J. F. Knott 403

The effects of stress ratio on fatigue threshold
Zhao Xiaopeng 127

Endurance diagram
V. M. Radhakrishnan 513

Fatigue behaviour of cross-ply CFRP laminates made of T300 or T400 fibres
E. Petitpas, M. Renault and D. Valentin 245

Fatigue crack closure investigation using Moiré interferometry
T. G. F. Gray and P. M. MacKenzie 417

Fatigue crack growth of semi-elliptical surface cracks
N. B. McFadyen, R. Bell and O. Vosikovsky 43

Fatigue crack growth study of SCS6/Ti-15-3 composite
P. Kantzos and J. Telesman 409

Fatigue crack propagation in welded joints under variable-amplitude loading in synthetic sea water
A. Ohta, Y. Maeda, S. Machida and H. Yoshinari 475

Fatigue damage accumulation in 2024-T351 aluminium subjected to periodic reversed overloads
R. Jurcevic, D. L. DuQuesnay, T. H. Topper and M. A. Pompetzki 259

The fatigue life of a 13% Cr turbine blade steel
J. Congleton and W. Chen 91

Fatigue loading history reconstruction based on the rainflow technique
A. K. Khosrovanek and N. E. Dowling 99

Fatigue strength of spheroidal graphite cast iron at elevated temperatures under axial load
S. Kogoh, H. Ogino, T. Nakagawa, M. Kobayashi and K. Asami 199

Fatigue testing of a shape-optimized circular hole in a plate under tensile and bending loads
K. Bethge and C. Mattheck 489

A finite-element study of the notch effect at surface inclusions
A. Melander 154

Further assessment of cast steel for use in offshore structures
J. Healy, J. P. Chubb and J Billingham 191

Influence of high-frequency components on fatigue of welded joints
S. Sarkani 115

Low-cycle fatigue behaviour of a low-alloy high-strength steel
V. Singh, P. V. S. S. Raju, T. K. G. Namboodhiri and P. Rama Rao 289

Low-cycle fatigue of austempered ductile irons
Juin-Ren Hwang, Chia-Chaw Perng and Ying-Shyng Shan 481

Methods for comparing fatigue lives for spectrum loading
J. Solin 35

Microstructure and cyclic deformation behaviour of plain carbon and low-alloyed steels
D. Eifler and E. Macherauch 165

A model for variations in load on a simple soil-working implement
C. A. Glasbey and B. B. Harral 121

Multiaxial fatigue of welded shaft–flange connections of stirrers under random non-proportional torsion and bending
C. M. Sonsino and R. Pfohl 425
A new method of structural shape optimization based on biological growth
C. Mattheck and S. Burkhardt 185
On obtaining fatigue crack growth parameters from the literature
G. B. Sinclair and R. V. Pieri 57
Optimization of hydraulic cylinder housing
J. Samuelson, D. Holm and B. Esping 493
Paling effect of substructure and fatigue strength of alloys
Tan Yuxu, Ren Liping and Li Gang 131
A parametric study of the ratio of bending to membrane stress in tubular Y- and T-joints
M. P. Connolly, A. K. Hellier, W. D. Dover and J. Sutomo 3
Prediction of constant-amplitude fatigue life to failure under pulsating tension by use of the local-strain approach
A. Buch 505
Prediction of the stress distribution in tubular Y- and T-joints
A. K. Hellier, M. P. Connolly, R. F. Karé and W. D. Dover 25
Recent development in the fast corrosion fatigue analysis of offshore structures subject to random wave loading
J. C. P. Kam 458
Reconstitution of crack growth from fractographic observations after flight simulation loading
O. Pártl and J. Schijve 175
Residual strength in notched composite materials
M.-H. R. Jen and J. M. Hsu 267
The role of primary carbides in fatigue crack propagation in aeroengine bearing steels
A. Iqbal and J. E. King 234
A statistical approach to fatigue life predictions under random loading
J. Zapatero and J. Dominguez 107
Stress concentration factors for tubular Y- and T-joints
A. K. Hellier, M. P. Connolly and W. D. Dover 13
Time-variant structural reliability analysis using bivariate diffusive crack growth models
J. Nienstedt, A. Tsurui, H. Tanaka and G. I. Schuëller 83
Transitions between micro-brittle and micro-ductile material behaviour during FCP in short-fibre reinforced composites
V. M. Karbhari and A. Dolgopolsky 51
The use of ΔK when examining microstructural effects on small crack growth
D. J. Nicholls and J. W. Martin 469
When is a crack not a crack? Some data on the fatigue behaviour of cracks and sharp notches
D. Taylor, I. A. N. Staniaszek and J. F. Knott 397

The only up-to-date book on fatigue thresholds

FATIGUE THRESHOLDS · David Taylor

David Taylor has combined his vast experience in the area of fatigue with a comprehensive literature survey, to produce the first dedicated book on this subject.

- Concerned with the definition of limits to fatigue crack growth
- Discusses the measurement and practical application of the fracture mechanics parameter ΔK_{th}
- Addresses the stress and stress-intensity conditions which define the fatigue limit in materials and structures
- Aids materials selection and design

Contents: Introduction · Theories and mechanisms · Crack closure · Methods of measurement · The effect of microstructure and mechanical properties · The effect of environment and temperature · The effect of load configuration (including *R* ratio, overloads and random loading) · Short cracks · The effect of defect type (including notches, inclusions and residual stress) · Case studies and applications · Index

1989 234 x 156mm 224 pages 250 photographs, 30 diagrams Hardcover 0 408 03921 3 £40.00
